

Webhirsche: Profile

Webhirsche

Fee consortium of web designers, Vienna

Webhirsche is a subunit of „Hirsch Media Production“, a fee consortium of college students located in Vienna, Austria, who develop web solutions using the label Webhirsche. The consortium's purpose is the grouping of resources and coordination of the same.

Webhirsche sells web-programming services based on XHTML, PHP, CSS, MySQL, XML, XSLT, Javascript, and Flash. Our services comply with our criteria of high functionality, practicability, and easy handling according to our philosophy. These are always situational in the sense that they are different from project to project. However, they must always meet our customers' expectations.

In cooperation with other subunits of „Hirsch Media Production“ that work with film and music we are able to offer our customers multimedia solutions.

At the time this document is being written, our team is made up of three full-time college students at the University of Vienna: Sebastian Henzl, Florian Hahn, and Michael Lang. These care about customer support, planning, organizing, and realizing of projects, quality assurance, and, last but not least, programming.

Our references include projects as, for example, the very practical exchange platform „Ethnomitschriften“ for scripts written for college lectures (ethnomitschriften.at) as well as the multimedia project „Du bestimmst! Der Onlinekrimi zum Mitmachen!“ (dubestimmst.at.tf).
